TECHNOLOGY AND RESEARCH INTO DISABILITY

## The problems

200M

People live with Intellectual Disability world wide: 5-15% have challenging behaviours

23.8M

People with autism are non-verbal

962 million

People over 60

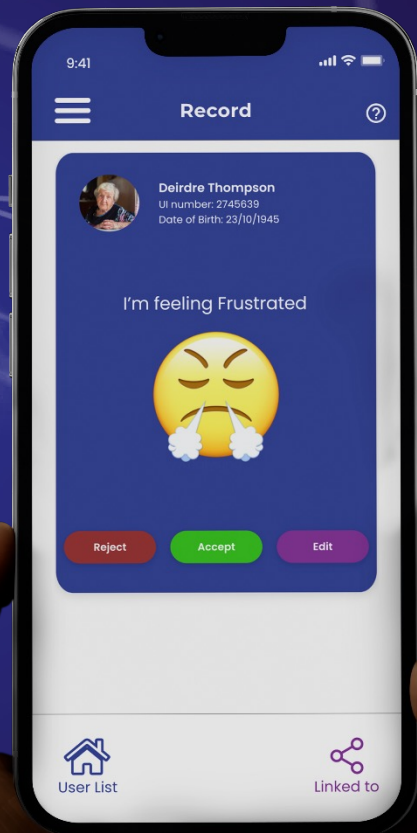

**This is double the number in 1980**

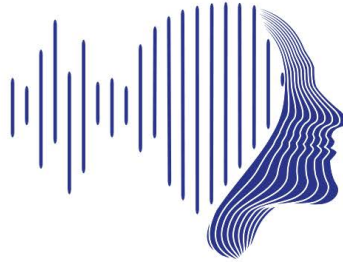

*"...the number of people with disabilities is increasing because of the aging of the population and the increase of chronic diseases" (WHO)*

# Empathic

## Mobile app and API

# eHealth Smart technology

- *Empathic* can detect the mood of non-verbal residents
- You can understand when a resident is upset by a care provider or by an event

Residents can communicate their feelings about people and events

Warning signs if a care provider is unsuitable

# API Features

- Simple API integration
- No customer identifiers
- We store recordings
- Dedicated system with full API models
