

Use of Biometric Time and Attendance at the Bon Secours Health System

Donal Sheahan – Project Manager, HRIS

February 7th 2017

The Initial Challenge

The Options

The Solution

- An ID Badge System identifies people on the basis of <u>what they have</u>
- A PIN/Password identifies people on the basis of <u>what they know</u>
- Biometrics is the only system that allows identification on the basis of <u>who they are</u>
- Allows for the possibility of Two Factor Authentication which we already have in place
- Acts as a proof of concept for Biometrics for other solutions across other areas of Health Care Provisions

 Access Control, Patient Records.

Introduced in 2009

Implementation

The Return
