SOCIAL PRESCRIPTION SOFTWARE

A digital solution for the **social prescribing** model of healthcare
Facilitating A '**More Than Medicine**' Approach To Health Improvement

Leeann Monk-Özgül
Co Founder & Director

Overarching Problem

- ♥ Chronic conditions and associated costs rising
- ♥ 80% of chronic conditions preventable
- ♥ Now widely accepted worldwide that a **'More than Medicine'** approach is needed.

What is Social Prescribing?

Connecting patients with a range of social, emotional or health needs to quality assured programmes and services in their own community to reduce their health risks.

Until now there has been no digital tool to facilitate this new model of health delivery:

... the Social Prescription

Specific Problems

Health Professionals

- ♥ 80% health professionals want to provide social prescribing
- ♥ No time to research activities in the community
- ♥ No quality assurance on suppliers
- ♥ No ability to track & monitor patient progress after referral

Employees/Patients

- ♥ Want to receive social prescriptions from GP to reduce their health risks
- ♥ Want to know more about health & wellbeing activities in community
- ♥ Need 1-1 support to keep motivated

Third Sector Delivery Organisations

- ♥ Need to track project outcomes to prove value for money to commissioners
- ♥ Need to track individual patient health risk to report back to their funders

Health Commissioners

- ♥ Need analytics from commissioned programmes to prove value for money,
- ♥ Need to track outcomes to justify expenditure to report back to department of health
