

# TiNY HEALTH

presented by founder, Gail Condon at the Health Summit, 2017

# What are the Problems?

## Communication Challenge

Paediatric health care teams struggle to communicate with children and parents. This results in confusion and worry.

## Children Excluded

from decisions regarding their health. This leads to non-compliance with their regime e.g. diabetes.

## Limited Educational Material

Health care companies and groups do not have a reliable source of children's health educational material.

# Our Solutions

## Innovative Solutions to Health Education using our Expertise and Software

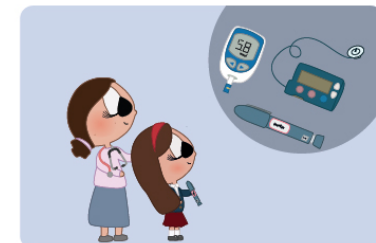

**App for Paediatric Teams to improve communication**
